

COMPANY PROFILE

ABOUT US

Tree Code founded in 2012 is a provider of cutting edge life-science instrumentation and consumables from renowned global manufacturers. **Tree Code** have a highly committed sales team, well trained application specialists and certified service engineers to provide immediate response and service support to all our clientele.

MISSION

To provide sophisticated & cutting edge technology to research, academic and medical communities in South East Asia with genuine focus on pre-sales and post-sales support.

VISION

To be a market leader, work closely with customers and provide total solutions to their on-going research.

OUR CORE VALUES

We are in the business of providing High Technology pragmatic Solutions and Consultation for the Medical, Scientific and Industrial World

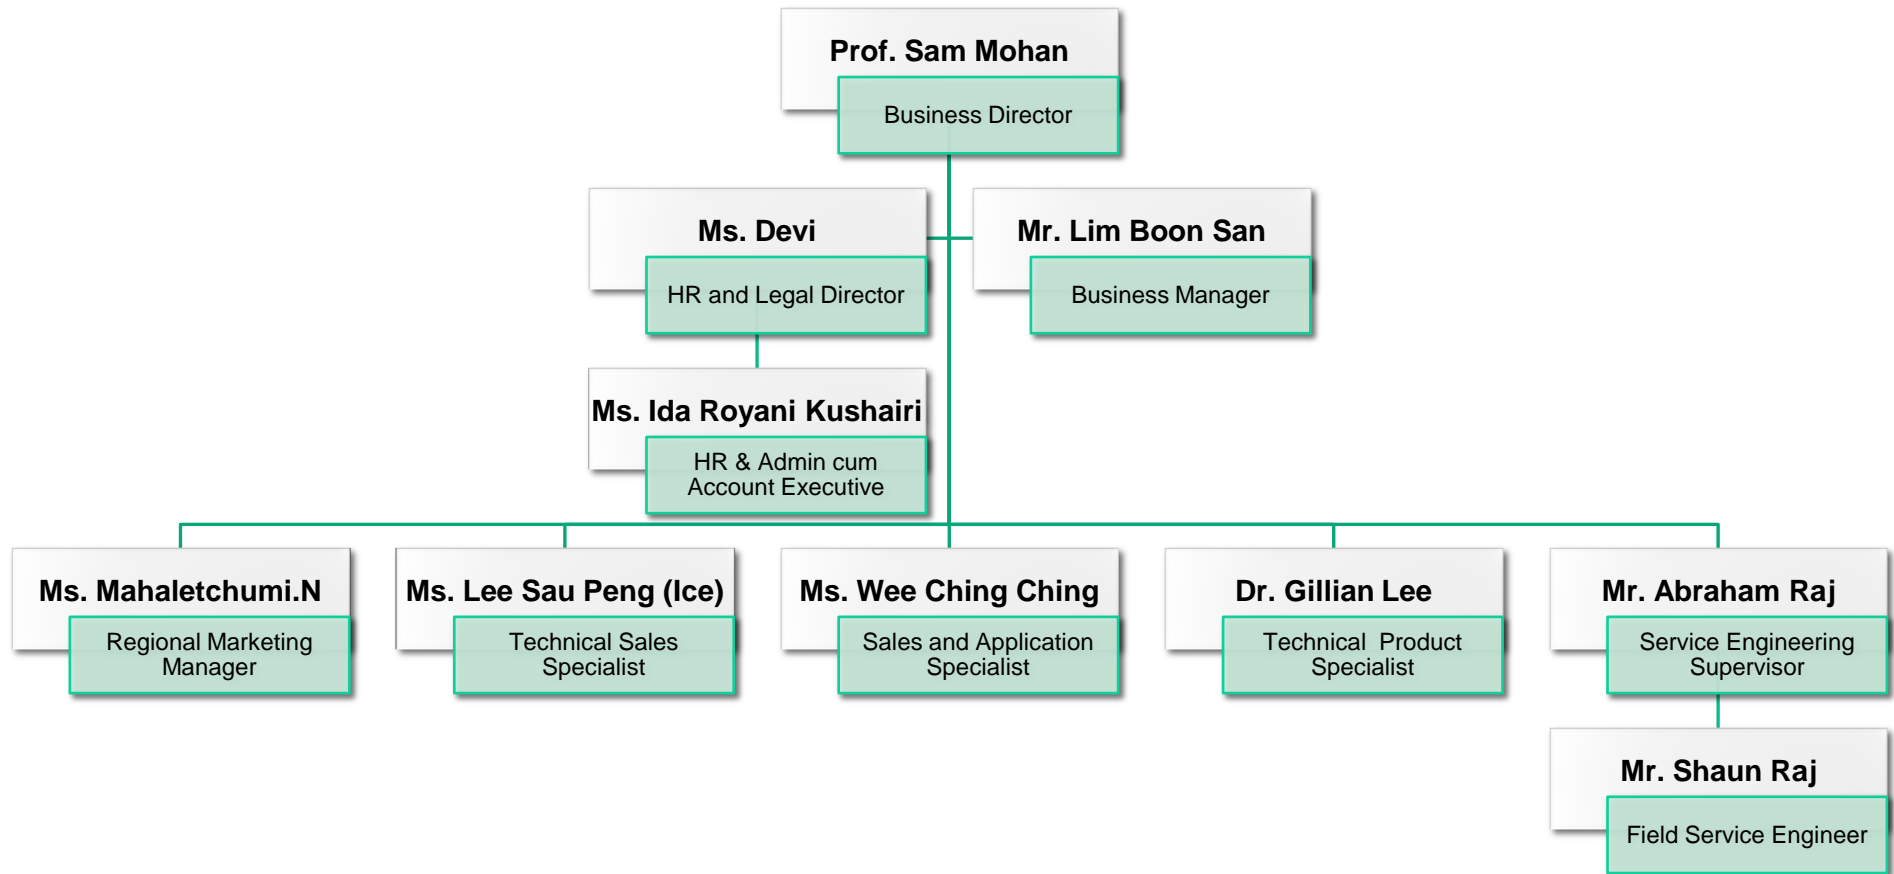

We offer world class Products and Services for a reasonable and justifiable fee

We guarantee that our long-term in nature, adhere or exceed the Industry Standards and work optimally

We Seek to Continuously provide the best Human, Technical and Marketing Support for our clients and partner

We strive for our staff and associates to be personable highly independent and competent

ORGANIZATIONAL CHART

PRODUCTS

PACBIO LONG-READ SINGLE MOLECULE, REAL-TIME (SMRT) SEQUENCING

The PacBio Sequencing provide long reads, high consensus accuracy, uniform coverage, single-molecule resolution and epigenetic detection. As a result, these unique platforms deliver a comprehensive view of genomes, transcriptomes, and epigenomes.

A CLOUD-BASED CLINICAL GENOMICS PLATFORM FOR PRECISION MEDICINE

An NGS data analysis suite designed for catering to the needs of today's biomedical, clinical and agricultural research communities.

TRANSFORMING NGS LIBRARY PREP APPLICATIONS

Products are designed for sequencing of DNA in whole genome, whole exome, epigenetics, or amplicon applications to accelerate workflow, improve uniformity, reduce library bias, and diminish coverage gaps.

THE GENOME REDEFINED. UNLOCK YOUR ORGANISM'S GENOME. UNCOVER MORE MEANING IN THE GENOME

Dovetail Genomics offer innovative technology, software and services to enhance your understanding of human disease and nature.

"YOUR LAB, YOUR WAY"

BioSoft Integrators' Laboratory Information Management System (LIMS), High Performance Computing (HPC) Solutions and all-encompassing Software Development Support allows customers to operate their labs according to their workflows, tracking, reporting and process needs.

REAGENTS AND CONSUMABLES FOR MOLECULAR RESEARCH

FairBiotech offers high quality and ISO certified (ISO 9001, ISO13485) products for life science research. It encompasses products for the isolation, detection, quantification, amplification, and characterization of nucleic acids.

MOLECULAR SEPARATIONS FOR GENOMIC AND PROTEOMIC RESEARCH

Princeton Separations specialized in molecular separations serving the sample prep needs of the genomic and proteomic research.
